PROFESSIONAL SUMMARY

Frontend Developer with **3 years of experience** specializing in building scalable web applications using the MERN stack. Proficient in JavaScript, React, Node.js, and RESTful APIs, with a strong eye for clean UI design. Known for quick problem-solving, collaborative mindset, and a commitment to continuous learning.

IT SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Material UI,

Backend: Node.js, Express.js, Supabase, Firebase

Databases: MongoDB,

APIs: RESTful APIs, JSON, WebSockets

Tools: Git, GitHub, Jira, Confluence, Postman

Testing: Jest, React Testing Library

PROFESSIONAL EXPERIENCE

Software Engineer at Codeplateau   06/2022 – present
Codeplateau   Pune, India

- Built responsive and dynamic UI components using **React.js** and **Material UI**, which improved overall user experience and reduced page load time by 25%.
- Collaborated with designers and backend teams to transform product requirements into scalable and maintainable frontend solutions.
- Developed and maintained full-stack features using **MERN stack**, ensuring smooth integration between frontend, backend, and database systems.
- Integrated **Redux** for advanced state management, enabling consistent data flow across the app and reducing code complexity in large modules.
- Worked on integrating **RESTful APIs** and **WebSockets** for real-time functionalities like chat, notifications, and live data sync.
- Conducted regular **code reviews** and mentored junior developers on best practices, resulting in cleaner code and better team collaboration.
- Implemented performance optimization techniques such as **lazy loading**, **memoization**, and **code splitting** for faster rendering.
- Conducted thorough testing and debugging to ensure the delivery of high-quality software products.

PROJECTS

Hubshift
Role: Software Engineer

- Responsible for coding and designing the Components for UI using ReactJs.
- Worked with **Material UI (MUI)** and custom UI components to create intuitive and visually appealing interfaces.
- Responsible for integrating **APIs** with React for dynamic content display.
- Implemented **Redux** for state management, optimizing data flow and improving application stability.
- Responsible for developing and maintaining **RESTful APIs** using the **Node JS** and **MongoDB** as database.
- Improved application performance by optimizing **React lifecycle methods, lazy loading, and memoization**.
- Ensured high-quality software delivery through **unit testing (Jest, React Testing Library)** and end-to-end testing.
- Improved development workflow and efficiency by automating deployment pipelines using **Git**, managing version control, and resolving merge conflicts.
